Art Unit: 2622

1. Claims 1-12 are allowed. Claim 1 is independent.

2. The following is an examiner's statement of reasons for allowance:

Claim 1 and its dependent claims 2-12 are allowable over the prior art of record. None of the prior art of record, cited below, teaches the last limitation recited in claim 1, that is, "wherein said scanning means starts to scan the original from the predetermined position without detecting the position of said scanning means by said detecting means when an original reading instruction is inputted within the predetermined time period".

Ishida et al. (U.S. Patent No. 5,239,341) teaches that the control CPU (301) detects the home position sensor (136) of the optical system during the back control, the back signal is produced for a predetermined period of time, the driver (520) alone is turned on, and a dynamic brake is applied to stop the scanner at the predetermined position (col. 21, lines 52-57). Ishida et al. does not disclose the claim limitation stated above in combination with other limitations of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Asakawa et al. (U.S. Patent No. 5,162,851) discloses a braking system for image formation apparatus (abstract).

Sasaki et al. (U.S. Patent No. 6,081,682) discloses an original scanning device with backward scanning control feature and related method.
